TableCell.FirstVerticalMerged

Description

Sets or returns whether the current cell is the first cell in a group of vertically merged cells. The first cell will contain all the content.

C#

```csharp
public boolean FirstVerticalMerged{ get; set; }
```

vb.net

```vbnet
Public Property FirstVerticalMerged() As Boolean
```

Examples

C#

```csharp
//--- Return FirstVerticalMerged
        bool merged = cell.FirstVerticalMerged;

        //--- Set FirstVerticalMerged
        cell.FirstVerticalMerged = true;
```

vb.net

```vbnet
'--- Return FirstVerticalMerged
        Dim merged As Boolean = cell.FirstVerticalMerged

        '--- Set FirstVerticalMerged
        cell.FirstVerticalMerged = True
```
