

Element.CreateSectionAfter()

Description

Creates and returns a [Section](#) object that represents a new section at the end of this Element.

C#

```
public virtual Section CreateSectionAfter()
```

vb.net

```
Public Overridable Function CreateSectionAfter() As Section
```

Returns

A [Section](#) object that represents a new section at the end of this Element.

Examples

C#

```
Section sect = e.CreateSectionAfter();
```

vb.net

```
Dim sect As Section = e.CreateSectionAfter()
```
