

Element.InsertTableAfter(Int32, Int32, TableFormatting)

Description

Creates and returns a [Table](#) at the end of this Element. The table will contain the specified number of rows and columns. It will also be formatted with the properties specified.

C#

```
public virtual Table InsertTableAfter(int rows, int columns, TableFormatting props)
```

vb.net

```
Public Overridable Function InsertTableAfter(ByVal rows As Integer, ByVal columns As Integer, ByVal props As TableFormatting) As Table
```

Parameters

rows

An `int` representing the number of rows the table will have.

columns

An `int` representing the number of columns the table will have.

props

A [TableFormatting](#) object representing the formatting properties to apply to the table.

Returns

A `Table` object representing the newly created table.

Examples

C#

```
Table tbl = e.InsertTableAfter(2, 3, tFormatting);
```

vb.net

```
Dim tbl As Table = e.InsertTableAfter(2, 3, tFormatting)
```
