

PivotTableField.Source

Introduced in build 8.4

Description

Returns the [SourceField](#) that was used to build the [PivotTableField](#) in the PivotTable.

C#

```
public SourceField Source{ get;}
```

vb.net

```
Public ReadOnly Property Source() As SourceField
```

Remarks

[ValuesLabels](#) and will return null. You can check if a PivotTable field is a values label with the [IsValuesLabel](#) Property
