Workbook.Palette

Description

Returns a Palette object that represents the specified workbook's color palette.

Public ReadOnly Property Palette() As Palette

```
public Palette Palette{ get; }

vb.net
```

Remarks

Each Excel workbook has a single color palette that manages formatting colors and some drawing layer colors. A color palette contains 56 colors that may be referenced. Each of these 56 colors may be customized, but changing a color in the palette will affect all formatting that uses the referenced color.

Examples

```
C#
Palette pal = wb.Palette;
```

```
vb.net

Dim pal As Palette = wb.Palette
```
