

Palette.GetColorAt(Int32)

Description

Returns the color at the specified 0-based index within the Palette.

C#

```
public Color GetColorAt(int index)
```

vb.net

```
Public Function GetColorAt(ByVal index As Integer) As Color
```

Parameters

index

The 0-based index of the color to return. Must be between 0 and 55.

Returns

The color at the specified index.

Remarks

For .xlsx files, this will return a color from the legacy palette. Colors in the legacy palette will be used when opening the file in Excel 2003.

Examples

C#

```
Color clr = pal.GetColorAt(4);
```

vb.net

```
Dim clr As Color = pal.GetColorAt(4)
```
