

SeriesDataLabel.LabelItemSeperator

Description

Sets or returns the string separating the different elements in the data label.

C#

```
public System.String LabelItemSeperator{ get; set; }
```

vb.net

```
Public Property LabelItemSeperator() As String
```

Remarks

This defaults to ", " for new series.

If this is set to null or an empty string, it will default to ", " when it writes to file.
