

SeriesDataLabel.ContainsValueAsPercentage

Description

Sets or returns whether the data label will contain the (y) value for the data point as a percentage. Only doughnut and pie charts can display values as percentages.

C#

```
public boolean ContainsValueAsPercentage{ get; set; }
```

vb.net

```
Public Property ContainsValueAsPercentage() As Boolean
```

Remarks

This defaults to false when creating a new Series.

The data label is considered disabled if this and [ContainsBubbleSize](#), [ContainsCategoryName](#), [ContainsSeriesName](#), and [ContainsValue](#) are all false.

If the series category type is not a pie or doughnut chart, then this property has no effect.
