

HeaderFooterSection.Section

Introduced in build 4.5.1

Description

A [Section](#) value specifies a section of the header or footer.

C#

```
public sealed class Section : TypesafeEnum
```

vb.net

```
Public NotInheritable Class Section  
Inherits TypesafeEnum
```

Remarks

Use these values when calling [PageSetup.GetHeader\(Section\)](#) or [PageSetup.GetFooter\(Section\)](#) to specify which area of the header or footer you want to retrieve.

Values

Name	Description
Left	The left portion of the header or footer
Center	The center portion of the header or footer
Right	The right portion of the header or footer
