

Worksheet.DeleteColumn(Int32)

Description

Deletes a column and its contents from the worksheet. Columns after the deleted column will be moved to the left.

C#

```
public void DeleteColumn(int columnNumber)
```

vb.net

```
Public Sub DeleteColumn(ByVal columnNumber As Integer)
```

Parameters

columnNumber

The 0-based number of the column to remove.

Examples

C#

```
ws.DeleteColumn(9);
```

vb.net

```
ws.DeleteColumn(9)
```
