ChartInterior.Pattern

Description

Sets or returns the background pattern of the specified chart region.

C#

```
public Pattern Pattern{ get; set; }
```

---

vb.net

```
Public Property Pattern() As Pattern
```

Remarks

This is an instance of `ChartFillPattern`.

For chart regions that normally have a filled background (such as `Chart.ChartArea`), this will be `Solid` by default. For chart regions that normally have no background (such as `ChartText` instances like `Chart.ChartTitle`) this will be `None` by default.

Setting `Pattern` to `null` will throw an `ArgumentException`.
