

ChartText.GetCharacters

Overload	Description
GetCharacters(Int32)	Returns a CharacterRun object representing a range of characters within the text. Use this to set a font on specified characters within the ChartText object. <i>(This has no meaning for SeriesDataLabel on a series, only for SeriesDataLabel on a data point.)</i>
GetCharacters(Int32, Int32)	Returns a CharacterRun object representing a range of characters within the text. Use this to set a font on specified characters within the ChartText object. <i>(This has no meaning for SeriesDataLabel on a series, only for SeriesDataLabel on a data point.)</i>
