AutoFilter.Area

Introduced in build 8.3

Description

Sets or returns an Area object that represents the area of cells that the filter is applied to in the worksheet.

C#

```csharp
public Area Area{ get; set; }
```

---

vb.net

```vbnet
Public Property Area() As Area
```

Examples

C#

```csharp
//--- Get filter's Area
Area filterArea = autoFilter.Area;

//--- Set filter's Area
autoFilter.Area = filterArea;
```

---

vb.net

```vbnet
'--- Get filter's Area
Dim filterArea As Area = autoFilter.Area

'--- Set filter's Area
autoFilter.Area = filterArea
```
