

# WordApplication.Version

## Description

Returns the exact version of WordWriter. The format of the version string returned is:

**C#**

```
public System.String Version{ get; }
```

**vb.net**

```
Public ReadOnly Property Version() As String
```

## Remarks

[Version](#) is a **Read Only** property.

## Examples

**C#**

```
string ver = oWordApplication.Version;
```

**vb.net**

```
Dim ver As String = oWordApplication.Version
```
