Section.GetBorder(Border.Location)

Description

Returns a Border object that represents the border of this section at the specified location. You can use the returned object to manipulate the borders for this section. Valid locations: Top, Left, Bottom, Right

C#

```
public Border GetBorder(Location location)
```

vb.net

```
Public Function GetBorder(ByVal location As Location) As Border
```

Parameters

location

Returns

A `Border` object that represents the border of this section at the specified location.

Remarks

MS Word equivalent: Format menu > Borders and shading... > Borders tab

Examples

C#

```
Border oBorder = oSection.GetBorder(Border.Location.Top);
```

vb.net

```
Dim oBorder As Border = oSection.GetBorder(Border.Location.Top)
```
