

Section.LinesBetween

Description

Sets or returns a `boolean` that represents whether or not Word will draw vertical lines between columns.

C#

```
public boolean LinesBetween{ get; set; }
```

vb.net

```
Public Property LinesBetween() As Boolean
```

Remarks

MS Word equivalent: Format menu > Columns... > Line between

Examples

C#

```
//--- Return LinesBetween
bool linesBetween = oSection.LinesBetween;

//--- Set LinesBetween
oSection.LinesBetween = true;
```

vb.net

```
'--- Return LinesBetween
Dim linesBetween As Boolean = oSection.LinesBetween

'--- Set LinesBetween
oSection.LinesBetween = True
```
