

Document.ChangeTracking

Description

Returns a [WordChangeTracking](#) object that can be used to get and set the change tracking settings for this [Document](#).

C#

```
public WordChangeTracking ChangeTracking{ get; }
```

vb.net

```
Public ReadOnly Property ChangeTracking() As WordChangeTracking
```

Examples

C#

```
WordChangeTracking oWordChangeTracking = oDocument.ChangeTracking;
```

vb.net

```
Dim oWordChangeTracking As WordChangeTracking = oDocument.ChangeTracking
```
