

Document.Styles

Description

Returns a [Styles](#) object that represents the Styles embedded in this document.

C#

```
public Styles Styles{ get; }
```

vb.net

```
Public ReadOnly Property Styles() As Styles
```

Remarks

MS Word equivalent: Format menu > Styles and Formatting...

Examples

C#

```
Styles style = oDocument.Styles;
```

vb.net

```
Dim styles As Styles = oDocument.Styles
```
