

Font.Animation

Description

Sets or returns a [Font.TextAnimation](#) object that represents the text animation for a character run.

C#

```
public TextAnimation Animation{ get; set; }
```

vb.net

```
Public Property Animation() As TextAnimation
```

Remarks

MS Word equivalent: Format menu > Font... > Text Effects tab > Animations:

Examples

C#

```
//--- Return TextAnimation
    Font.TextAnimation oTextAnimation = oFont.Animation;

    //--- Set TextAnimation to LasVegasLights
    oFont.Animation = Font.TextAnimation.LasVegasLights;
```

vb.net

```
'--- Return TextAnimation
    Dim oTextAnimation As Font.TextAnimation = oFont.Animation

    '--- Set TextAnimation to LasVegasLights
    oFont.Animation = Font.TextAnimation.LasVegasLights
```
