

Table.DeleteRows(Int32, Int32)

Description

Deletes one or more rows from the table.

C#

```
public void DeleteRows(int startIndex, int numRows)
```

vb.net

```
Public Sub DeleteRows(ByVal startIndex As Integer, ByVal numRows As Integer)
```

Parameters

startIndex

The 0-based index of the first row to delete.

numRows

The number of rows to delete.

Examples

C#

```
tbl.DeleteRows(2, 5);
```

vb.net

```
tbl.DeleteRows(2, 5)
```
