

DocumentProperties.Keywords

Description

Sets or returns a String that represents any keywords that are added to this file.

C#

```
public System.String Keywords{ get; set; }
```

vb.net

```
Public Property Keywords() As String
```

Remarks

MS Word equivalent: File menu > Properties > Summary tab > Keywords:

Examples

C#

```
//--- Return Keywords
string keywords = docProps.Keywords;

//--- Set Keywords
docProps.Keywords = "Confidential, Memo";
```

vb.net

```
'--- Return Keywords
Dim keywords As String = docProps.Keywords

'--- Set Keywords
docProps.Keywords = "Confidential, Memo"
```
