

WordChangeTracking.ShowAnnotationRevisions

Description

Sets or returns a boolean that represents whether or not Word will show annotations in this document.

C#

```
public boolean ShowAnnotationRevisions{ get; set; }
```

vb.net

```
Public Property ShowAnnotationRevisions() As Boolean
```

Remarks

This option is set to true by default.

Examples

C#

```
//--- Return ShowAnnotationRevisions
bool showAnnotationRevisions = changeTracking.ShowAnnotationRevisions;

//--- Set ShowAnnotationRevisions
changeTracking.ShowAnnotationRevisions = false;
```

vb.net

```
'--- Return ShowAnnotationRevisions
Dim showAnnotationRevisions As Boolean =
changeTracking.ShowAnnotationRevisions

'--- Set ShowAnnotationRevisions
changeTracking.ShowAnnotationRevisions = False
```
