

ParagraphFormatting.LineSpacing

Description

Returns an `int` representing the line spacing for a paragraph.

C#

```
public int LineSpacing{ get; }
```

vb.net

```
Public ReadOnly Property LineSpacing() As Integer
```

Remarks

There are three types of line spacing: `AtLeast`, `Exactly`, and `Multiple`. `AtLeast` and `Exactly` are set in twips. One twip = (1/20 pt) or (1/1440 in). `Multiple` is set in number of lines. `AtLeast` must be between 0 pt (0 twips) and 1584 pt (31680 twips). `Exactly` must be between 0.7 pt (14 twips) and 1584 pt (31680 twips). `Multiple` must be between 1 line and 132 lines. Values beyond these for all 3 types will be adjusted automatically.

MS Word equivalent: Format menu > Paragraph... > Indents and Spacing > Spacing section > At:

The default value for this property is 2.

Examples

C#

```
//--- Return LineSpacing
    int lineSpacing = oParagraphFormatting.LineSpacing;
```

vb.net

```
'--- Return LineSpacing
    Dim lineSpacing As Integer = oParagraphFormatting.LineSpacing
```
