

CompatibilitySettings.AlignRowsIndependent

Description

Sets or returns a `boolean` that represents whether or not Word will align table rows independently of one another in this document.

C#

```
public boolean AlignRowsIndependent{ get; set; }
```

vb.net

```
Public Property AlignRowsIndependent() As Boolean
```

Remarks

MS Word equivalent: Tools menu > Options... > Compatibility tab > Compatibility options for [filename].doc section > Options > Align table rows independently

Examples

C#

```
//--- Return AlignRowsIndependent
    bool alignRowsIndependent = cs.AlignRowsIndependent;

//--- Set AlignRowsIndependent
cs.AlignRowsIndependent = true;
```

vb.net

```
'--- Return AlignRowsIndependent
    Dim alignRowsIndependent As Boolean = cs.AlignRowsIndependent

'--- Set AlignRowsIndependent
cs.AlignRowsIndependent = True
```
