TableCell.Merged

Description

Sets or returns whether this cell has been merged with a preceding horizontal cell.

```
c#
public boolean Merged{ get; set; }

vb.net
Public Property Merged() As Boolean
```

Examples

```
C#

//--- Return Merged

bool merged = cell.Merged;

//--- Set Merged

cell.Merged = true;
```

```
vb.net

'--- Return Merged

Dim merged As Boolean = cell.Merged

'--- Set Merged

cell.Merged = True
```
