

InlineImage.GetImage(InlineImage.Format)

Description

Returns the image in the given format.

C#

```
public System.IO.Stream GetImage(Format imgFormat)
```

vb.net

```
Public Function GetImage(ByVal imgFormat As Format) As System.IO.Stream
```

Parameters

format

An [InlineImage.Format](#) of the type you wish to return.

Returns

A [System.IO.Stream](#) object that represents the image that was inserted.

Exceptions

System.Exception

Examples

C#

```
System.IO.Stream image = firstImage.GetImage(InlineImage.Bmp);
```

vb.net

```
Dim image As System.IO.Stream = firstImage.GetImage(InlineImage.Bmp)
```
