

Element.ImportData(System.Data.DataTable, DataImportProperties)

Description

Imports data from a [DataTable](#) into a [Table](#) at the point of this [Element](#) in the document. Also accepts a [DataImportProperties](#) object that contains the options for importing.

C#

```
public Table ImportData(System.Data.DataTable data, DataImportProperties props)
```

vb.net

```
Public Function ImportData(ByVal data As System.Data.DataTable, ByVal props As DataImportProperties) As Table
```

Parameters

data

Contains the data to be imported.

props

Import properties for this data import, including max rows, max columns, column filter, etc.

Returns

The [Table](#) that the data was imported into.

Examples

C#

```
Table tbl = e.ImportData(dt, importProps);
```

vb.net

```
Dim tbl As Table = e.ImportData(dt, importProps)
```
