

Element.InsertImageAfter(System.IO.Stream)

Description

Inserts and returns an [InlineImage](#) at the end of this Element. The image that will be inserted is specified by the stream parameter.

C#

```
public virtual InlineImage InsertImageAfter(System.IO.Stream stream)
```

vb.net

```
Public Overridable Function InsertImageAfter(ByVal stream As System.IO.Stream) As  
    InlineImage
```

Parameters

stream

A [Stream](#) containing the image to insert.

Returns

An [InlineImage](#) object that represents the image that was inserted.

Exceptions

System.Exception

If the image file is not a valid format. See [InlineImage.Format](#) for a list of supported formats.

Examples

C#

```
InlineImage image = e.InsertImageAfter(strm);
```

vb.net

```
Dim image As InlineImage = e.InsertImageAfter(strm)
```
