

Element.InsertHyperlinkAfter(String, String)

Description

Creates and returns a [Hyperlink](#) at the beginning of this Element. This hyperlink will have the specified url and displayed text.

C#

```
public virtual Hyperlink InsertHyperlinkAfter(System.String url, System.String display)
```

vb.net

```
Public Overridable Function InsertHyperlinkAfter(ByVal url As String, ByVal display As String) As Hyperlink
```

Parameters

url

A `String` representing the url to link to.

display

A `String` representing the text that will displayed in the document for this hyperlink.

Returns

A `Hyperlink` object representing the newly created hyperlink.

Exceptions

System.Exception

Examples

C#

```
Hyperlink link = e.InsertHyperlinkAfter("http://www.softartisans.com",  
"SoftArtisans");
```

vb.net

```
Dim link As Hyperlink = e.InsertHyperlinkAfter("http://www.softartisans.com",  
"SoftArtisans")
```
