

DocumentProperties.Item(String)

Description

Returns the value of a specified property. The value can be one of the following types, depending on the property: String, Double, Integer, Boolean or DateTime.

C#

```
public System.Object this[System.String propertyName] { get; set; }
```

vb.net

```
Public Default Property Item(ByVal propertyName As String) As Object
```

Parameters

property

The built-in property.

Returns

The value of the built-in property.

Examples

C#

```
//--- Get Property
Object application = docProps["Application"];

//--- Set Property
docProps["Application"] = "pptw";
```

vb.net

```
'--- Get Property  
Dim application As Object = docProps("Application")  
  
'--- Set Property  
docProps("Application") = "pptw"
```
