

DocumentProperties.SetCustomProperty(String, Object)

Description

Use [SetCustomProperty](#) to create a custom document property. Pass the method the name and value of the property. The value can be one of the following types, depending on the property: String, Double, Integer, Boolean, or DateTime.

C#

```
public void SetCustomProperty(System.String key, System.Object value)
```

vb.net

```
Public Sub SetCustomProperty(ByVal key As String, ByVal value As Object)
```

Parameters

key

The key or name of the custom property.

value

The value of the custom property.

Examples

C#

```
docProps.SetCustomProperty("Reviewed by", "J. Smith");
```

vb.net

```
docProps.SetCustomProperty("Reviewed by", "J. Smith")
```
