

OfficeWriter Designer for Word - Enterprise Feature

OfficeWriter Reporting Services Integration is available in both [OfficeWriter Enterprise Edition](#) and [OfficeWriter Standard Edition](#). When you select a feature that is available in the Enterprise Edition only, the **Enterprise Feature** dialog will open. The dialog allows you to disable the warning and/or hide Enterprise features.

Both the **Enterprise Feature** dialog and Enterprise features can also be disabled through [registry settings](#) "Hide Enterprise Features" and "No Enterprise Features Warning."

You can also set whether to show or hide Enterprise features through [The OfficeWriter Designer for Word](#). Go to **Help > Settings** and select/de-select **Show Enterprise Features**.

- To prevent the display of the **Enterprise Feature** dialog the next time an Enterprise feature is selected, uncheck **Show this warning when Enterprise Edition feature is used**.
- To hide Enterprise features on the OfficeWriter toolbar, click **Hide EE Features**.
