# Designer .NET Excel - Report Properties

The **Report Properties** dialog displays properties that are specific to the report, for example, the *Author* or *Description* fields. The dialog is available by clicking *Properties* in the OfficeWriter Designer .NET toolbar.

To modify report properties:

1. Click **Report Properties**

2. Modify the properties that are available.

3. Click **OK**.

Report properties that are currently available (as of 8.6):

- Author (text)
- Description (text)
