

# Charts.AddChart(Chart, Anchor)

## Description

Creates a copy of the specified chart and adds it to the current worksheet. This method allows you to add a chart from an external workbook to the worksheet, or to duplicate a chart within a single workbook. The properties and settings on the original chart will be preserved

### C#

```
public void AddChart(Chart chart, Anchor cornerTopLeft)
```

### vb.net

```
Public Sub AddChart(ByVal chart As Chart, ByVal cornerTopLeft As Anchor)
```

## Parameters

### ***chart***

The new Chart to add to the workbook.

### ***cornerTopLeft***

The location on the new worksheet to anchor the upper left corner of the chart.
