

Section.LinesBetween

Description

Sets or returns a `boolean` that represents whether or not Word will draw vertical lines between columns.

C#

```
public boolean LinesBetween{ get; set; }
```

vb.net

```
Public Property LinesBetween() As Boolean
```

Remarks

MS Word equivalent: Format menu > Columns... > Line between

Examples

C#

```
//--- Return LinesBetween  
bool linesBetween = oSection.LinesBetween;  
  
//--- Set LinesBetween  
oSection.LinesBetween = true;
```

vb.net

```
'--- Return LinesBetween  
Dim linesBetween As Boolean = oSection.LinesBetween  
  
'--- Set LinesBetween  
oSection.LinesBetween = True
```
