

WordChangeTracking.ShowInsertDeleteRevisions

Description

Sets or returns a boolean that represents whether or not Word will show insert and delete revisions in this document.

C#

```
public boolean ShowInsertDeleteRevisions{ get; set; }
```

vb.net

```
Public Property ShowInsertDeleteRevisions() As Boolean
```

Remarks

This option is set to true by default.

MS Word equivalent: Tools menu > Options... > Track changes tab > Markup section > Insertions: and Deletions:

Examples

C#

```
//--- Return ShowInsertDeleteRevisions
bool showInsertDeleteRevisions = changeTracking.ShowInsertDeleteRevisions;

//--- Set ShowInsertDeleteRevisions
changeTracking.ShowInsertDeleteRevisions = false;
```

vb.net

```
'--- Return ShowInsertDeleteRevisions
Dim showInsertDeleteRevisions As Boolean =
changeTracking.ShowInsertDeleteRevisions

'--- Set ShowInsertDeleteRevisions
changeTracking.ShowInsertDeleteRevisions = False
```
