

# UpDownBar

## Description

An [UpDownBar](#) object represents up/down bars in a line chart. Up/down bars connect data points in the highest and lowest series in a line chart to show motion during an interval.

### C#

```
public sealed class UpDownBar
```

### vb.net

```
Public NotInheritable Class UpDownBar
```

## Remarks

To return an [UpDownBar](#) object, use [SettingsLineAreaScatter.UpDownBar](#) .
