

Charts

Description

The Charts collection contains all charts in the specified worksheet. Chart sheets are not included in this collection. To return a `Charts` collection, use `Worksheet.Charts`.

C#

```
[DefaultMember("Item")]  
public sealed class Charts : System.Collections.Generic.IEnumerable<Chart>
```

vb.net

```
<DefaultMember("Item")> _  
Public NotInheritable Class Charts  
    Implements System.Collections.Generic.IEnumerable(Of Chart)
```

Properties

| Name | Description |
|--------------------|------------------------------------------------|
| <code>Count</code> | Returns the number of charts in the worksheet. |

Indexers

| Name | Description |
|---------------------------|--------------------------------------------------------------------------------------------|
| <code>Item(Int32)</code> | Returns the chart at the specified 0-based position in the <code>Charts</code> collection. |
| <code>Item(String)</code> | Returns the chart with the specified name in the <code>Charts</code> collection. |

Methods

| Name | Description |
|---------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <code>AddChart(Chart, Anchor)</code> | Creates a copy of the specified chart and adds it to the current worksheet. This method allows you to add a chart from an external workbook to the worksheet, or to duplicate a chart within a single workbook. The properties and settings on the original chart will be preserved. |
| <code>CreateChart(ChartType, Anchor)</code> | Creates a new, blank chart of the specified type. |
| <code>GetEnumerator()</code> | Returns an <code>IEnumerator</code> for the Charts in a <code>Worksheet</code> . |
| <code>Remove(Chart)</code> | Permanently removes the specified chart from the worksheet. |
| <code>Remove(Int32)</code> | Permanently removes the chart at the specified position from the worksheet. |
