

SettingsBarColumn

Description

The `SettingsBarColumn` class contains all settings that are specific to bar and column series. To return a `SettingsBarColumn` object, use `Series.SettingsBarColumn`.

C#

```
public sealed class SettingsBarColumn
```

vb.net

```
Public NotInheritable Class SettingsBarColumn
```

Properties

Name	Description
DataShapeType	Sets or returns the shape type used for three-dimensional charts.
Overlap	Sets or returns the overlap between bars or columns for a category.
SpaceBetweenCategories	Sets or returns the space between categories in bar and column charts.

Nested Classes

Name	Description
ShapeType	<code>SettingsBarColumn.ShapeType</code> class contains the shapes that can be used for three-dimensional column and bar charts.
