

SourceFieldCollection

Introduced in build 8.4

Description

The `SourceFieldCollection` class contains a list of `SourceField` objects. To get a `SourceFieldCollection` object, use `PivotTable.SourceFields`.

C#

```
public sealed class SourceFieldCollection
```

vb.net

```
Public NotInheritable Class SourceFieldCollection
```

Properties

Name	Description
<code>Count</code>	Returns the number of <code>SourceFields</code> in the collection.

Indexers

Name	Description
<code>Item(Int32)</code>	Returns the <code>SourceField</code> at the specified index.
<code>Item(String)</code>	Returns the <code>SourceField</code> with the specified name.
