

# ChartText.GetCharacters

Overload	Description
<a href="#">GetCharacters(Int32)</a>	Returns a <a href="#">CharacterRun</a> object representing a range of characters within the text. Use this to set a font on specified characters within the <a href="#">ChartText</a> object. <i>(This has no meaning for <a href="#">SeriesDataLabel</a> on a series, only for <a href="#">SeriesDataLabel</a> on a data point.)</i>
<a href="#">GetCharacters(Int32, Int32)</a>	Returns a <a href="#">CharacterRun</a> object representing a range of characters within the text. Use this to set a font on specified characters within the <a href="#">ChartText</a> object. <i>(This has no meaning for <a href="#">SeriesDataLabel</a> on a series, only for <a href="#">SeriesDataLabel</a> on a data point.)</i>
