

Workbook.HorizontalPosition

Description

Sets or returns the horizontal (x) position of the workbook window's upper left corner when displayed in Excel.

C#

```
public int HorizontalPosition{ get; set; }
```

vb.net

```
Public Property HorizontalPosition() As Integer
```

Remarks

In Excel 2007 and 2010 this property is measured in twips.
Values may be different than in ExcelApplication for earlier versions of Excel.

Examples

C#

```
//--- Get the horizontal position of the workbook window's upper left corner  
int winHoriz = wb.HorizontalPosition;  
  
//--- Set the horizontal position of the workbook window's upper left corner  
wb.HorizontalPosition = 100;
```

vb.net

```
'--- Get the horizontal position of the workbook window's upper left corner  
Dim winHoriz As Integer = wb.HorizontalPosition  
  
'--- Set the horizontal position of the workbook window's upper left corner  
wb.HorizontalPosition = 100
```
