

ExcelWriter Learning Center

Getting Started

The tutorials in this section are designed to make getting started with ExcelWriter quick and easy. They have corresponding downloadable Visual Studio solutions.

Tutorials

Hello World Tutorial

- [Hello World using ExcelTemplate](#)
- [Hello World Using ExcelApplication](#)

Basic Tutorials

- [Simple Expense Summary](#) — The Simple Expense Summary presents sales information for a group in AdventureWorks over a single fiscal year. This sample consists of three tutorials that demonstrate the basics of designing a report with ExcelTemplate. By the end of this sample you'll be able to create reports with data, formatting, formulas and charts with as few as five lines of code.
- [Extended Sales Summary](#) — The Extended Sales Summary presents some grouped sales information for a single fiscal quarter. This sample consists of two tutorials that present an introduction to the ExcelApplication object and how to use the ExcelApplication object in combination with ExcelTemplate. By the end of this tutorial, you will be able to create a dynamic template with copied sheets and a coversheet.
- [Financial Report](#) — The Financial Report presents assets and losses divided by quarter. This tutorial consists of three parts that cover the use of data marker modifiers and template formats. The tutorial also covers using ExcelApplication to copy between two workbooks. By the end of this tutorial you will be able to format data markers and post-process on multiple workbooks.

More Information

The resources here will help you get the most out of ExcelWriter.

Topics

This topics section offers best practices and guides to complement the tutorials section. While the tutorials focuses on how to do something, the topics section focuses on when you use certain techniques, and why.

ExcelWriter Topics

- Preprocessing vs. Postprocessing
- How ExcelWriter Inserts Rows
- Effective Use of Styles
- Best Practices with Large Reports
- SharePoint Solution - Excel Export Plus
- Switching from XLS to XLSX or XLSM
- Intro to PivotTables
- Calculation Engine Supported Formulas

Sample Code

The ExcelWriter Samples include complete code samples with downloadable data, template files, and output files.

ExcelApplication Samples

- Basic Steps
- Basic Steps R1C1
- Application to Template Sample
- Template to Application Sample
- Multiple Chart Report
- Scatter Chart Report
- Two Axis Chart Sample
- Grouping and Subtotals
- Data Validation
