

Hyperlink.Text

Description

Sets or returns the hyperlink's displayed text.

C#

```
public System.String Text{ get; set; }
```

vb.net

```
Public Property Text() As String
```

Remarks

By default the display text is the same as the hyperlink. Setting this property will not change the location that is linked to, but will change the text that is displayed.

Examples

C#

```
//--- Get Text
    string linkText = link.Text;

    //--- Set Text
    link.Text = "SoftArtisans";
```

vb.net

```
'--- Get Text
    Dim linkText As String = link.Text

    '--- Set Text
    link.Text = "SoftArtisans"
```
