

# ChartInterior

## Description

A [ChartInterior](#) object contains formatting properties of a [ChartRegion](#) or an object extending [ChartRegion](#) ( [AxisLabel](#), [ChartText](#), [Legend](#), or [SeriesDataLabel](#) ).

### C#

```
public sealed class ChartInterior
```

### vb.net

```
Public NotInheritable Class ChartInterior
```

## Remarks

property of the following classes: [ChartRegion](#), [AxisLabel](#), [ChartText](#), [Legend](#), and [SeriesDataLabel](#).

If the pattern is Solid, you should set the fill through the [ForegroundColor](#). The [BackgroundColor](#) is the incorrect way to set a solid fill.

## Properties

Name	Description
<a href="#">BackgroundColor</a>	Sets or returns the background color of the specified chart region.
<a href="#">ForegroundColor</a>	Sets or returns the foreground color of the specified chart region.
<a href="#">Pattern</a>	Sets or returns the background pattern of the specified chart region.
<a href="#">Visible</a>	Sets or returns whether the specified chart region is visible.

## Methods

Name	Description
<a href="#">ClearFillEffects()</a>	Clears any pattern and color from the chart interior, setting it to the automatic color instead.
