

# Upgrading from OfficeWriter v8

## Methods deprecated in OfficeWriter v8

A number of methods were deprecated in OfficeWriter v8. As of the v9 release, these methods are no longer available in our API.

### ExcelTemplate

The following is a list of ExcelTemplate methods that are now deprecated. Also listed are the methods that should be used in v9 to replace the deprecated methods.

| ExcelTemplate v8 Method           | ExcelTemplate v9 Method                      |
|-----------------------------------|--|
| ExcelTemplate.SetCellDataSource   | <a href="#">ExcelTemplate.BindCellData</a>   |
| ExcelTemplate.SetColumnDataSource | <a href="#">ExcelTemplate.BindColumnData</a> |
| ExcelTemplate.SetRowDataSource    | <a href="#">ExcelTemplate.BindRowData</a>    |
| ExcelTemplate.SetDataSource       | <a href="#">ExcelTemplate.BindData</a>       |

### ExcelApplication

The following is a list of ExcelApplication methods that are now deprecated. Also listed are the methods that should be used in v9 to replace the deprecated methods.

| ExcelApplication v8 Method | ExcelApplication v9 Method  |
|----------------------------|---|
| ExcelApplication.Create()  | <a href="#">ExcelApplication.Create(FileFormat)</a>                     |
| PageSetup.LeftFooter       | <a href="#">PageSetup.GetFooter(HeaderFooterSection.Section.Left)</a>   |
| PageSetup.CenterFooter     | <a href="#">PageSetup.GetFooter(HeaderFooterSection.Section.Center)</a> |
| PageSetup.RightFooter      | <a href="#">PageSetup.GetFooter(HeaderFooterSection.Section.Right)</a>  |
| PageSetup.LeftHeader       | <a href="#">PageSetup.GetHeader(HeaderFooterSection.Section.Left)</a>   |
| PageSetup.CenterHeader     | <a href="#">PageSetup.GetHeader(HeaderFooterSection.Section.Center)</a> |
| PageSetup.RightHeader      | <a href="#">PageSetup.GetHeader(HeaderFooterSection.Section.Right)</a>  |

### WordApplication

The following WordApplication method is now deprecated. The listed methods should be used in v9 to replace the deprecated method.

| WordApplication v8 Method | WordApplication v9 Method  |
|---------------------------|--|
| Table.PreferredWidth      | <a href="#">Table.SetPreferredWidth(Double, Units)</a><br><a href="#">Table.GetPreferredWidth(out Units)</a> |
