

# ExcelApplication.LicenseKey

## Description

The property sets or returns the license key that enables ExcelWriter. The key is stored in the registry. It contains information about ExcelWriter, including product name, platform, and version.

### C#

```
public System.String LicenseKey{ get; set; }
```

### vb.net

```
Public Property LicenseKey() As String
```

## Remarks

For assistance with licensing issues, contact SoftArtisans Technical Services (<http://support.softartisans.com/>).

## Examples

### C#

```
//--- Get LicenseKey  
string key= xla.LicenseKey;  
  
//--- Set LicenseKey  
xla.LicenseKey = "XXXXXX-XXXX-XXXX-XXXXXX";
```

### vb.net

```
'--- Get LicenseKey  
Dim keyAs String = xla.LicenseKey  
  
'--- Set LicenseKey  
xla.LicenseKey = "XXXXXX-XXXX-XXXX-XXXXXX"
```
