

ColumnProperties.Style

Description

Sets or returns a [Style](#) object that determines how cells in the column look, including number format, font, orientation, etc.

C#

```
public Style Style{ get; set; }
```

vb.net

```
Public Property Style() As Style
```

Examples

C#

```
Style styl = colProps.Style;
```

vb.net

```
Dim styl As Style = colProps.Style
```
