

Section.NumberFormat

Description

Sets or returns a [Section.NumberFormat](#) object that represents the page number format for this section. There are 5 type of page number formats:

C#

```
public NumberFormat PageNumberFormat{ get; set; }
```

vb.net

```
Public Property PageNumberFormat() As NumberFormat
```

Remarks

MS Word equivalent: Insert menu > Page Numbers... > Format... button > Number format:

Examples

C#

```
//--- Return PageNumberFormat
Section.NumberFormat oPageNumberFormat = oSection.PageNumberFormat;

//--- Set PageNumberFormat
oSection.PageNumberFormat = Section.NumberFormat.Arabic;
```

vb.net

```
'--- Return PageNumberFormat
Dim oPageNumberFormat As Section.NumberFormat = oSection.PageNumberFormat

'--- Set PageNumberFormat
oSection.PageNumberFormat = Section.NumberFormat.Arabic
```
