

# Section.LineNumModulus

## Description

Sets or returns an `int` that represents the line numbering modulus. This setting is used to set whether line numbers display on every line, every 2nd line, etc. Setting this to 0 (zero) will display no line numbers. Setting this to 1 will display a number by every line. Setting this to 2 will display a number by every 2nd line, etc.

**C#**

```
public int LineNumModulus{ get; set; }
```

**vb.net**

```
Public Property LineNumModulus() As Integer
```

## Remarks

MS Word equivalent: File > Page Setup... > Layout tab > Preview section (make sure Apply To: This Section is selected) > Line Numbers... button > Count by:

## Examples

**C#**

```
//--- Return LineNumModulus  
int lineNumModulus = oSection.LineNumModulus;  
  
//--- Set LineNumModulus  
oSection.LineNumModulus = 2;
```

**vb.net**

```
'--- Return LineNumModulus  
Dim lineNumModulus As Integer = oSection.LineNumModulus  
  
'--- Set LineNumModulus  
oSection.LineNumModulus = 2
```
